WORK HISTORY

SOFTWARE ENGINEER

04/2022 to CURRENT

PrismHR | Remote, Remote

- Developing the frontend using Angular
- Developing APIs and surrounding logic using Sails.js and Node.js
- Setting up my environment through WSL2 on Windows and helping create documentation for the process
- Working with Git and GitLense to figure out discrepancies between branches and commits, helping to find the source of bugs and fix them
- Debugging development and production level bugs
- Working in an agile environment
- Participating in daily standup meetings and working closely with team members including senior software engineers and managers
- Utilizing Git and GitHub for version control at a professional level

SOFTWARE ENGINEER

07/2021 to 02/2022

CourtCall | Remote, Remote

- Using Vue.js, Vuetify, HTML. CSS. JavaScript. TypeScript. Trello, Figma, GitLab, Slack, Docker, Inversify, I18n and Vuex to build a video conferencing web application for remote court appearances
- Building the UI and improving functionalities including the audio-video setup page, the admin portion of the application which includes the creation of meetings, and chat/notifications/other features that are present in meeting
- Utilizing OpenAPI to pull data (ex. participant, case, chat, system user data and more) and displayed it to users in a visually appealing manner for them to view, update and/or delete
- Collaborated with the team and participated in team meetings
- Worked on making the application responsive and visually appealing on all possible screen sizes

Contact : Matt Wapnick - mattw@courtcalls.com or 310-743-1864

SOFTWARE ENGINEER

05/2021 to 07/2021

LeNginer | Remote, USA

- Used Express, React, and Node.js to develop a car listing website
- Collaborated with other developers to design and optimize code
- Developed API to pull data on cars such as make, model, etc. using Express and Node.js

Contact: Al Rahrooh - Al.Rahrooh@lengineer.com or 407-733-1714

PATENT DRAFTER

06/2020 to 09/2020

IP DaVinci | Remote, USA

- Helped create the company website using HTML, CSS, JavaScript, and WordPress
- Responsible for drafting technical patent drawings and delivery of over 20 projects for clients
- Organized a digital marketing strategy to improve visibility resulting in four new clients
